CPM ERP

Enterprise Solutions Guide

Flexible, integrated, and sustainable ERP solutions for businesses.

Since 1989
The Power of Locally Developed Software

About CPM Software

From 1989 to Today

The Power of Local Software

Founded in Istanbul in 1989 with entirely domestic capital, CPM Software is one of Türkiye's leading providers of Enterprise Resource Planning (ERP) solutions.

Continuously expanding its extensive product portfolio alongside the development of domestic digital integration systems, CPM Software delivers flexible and versatile solutions tailored to the specific needs of businesses across various industries.

Committed to business ethics, quality, and customer satisfaction, CPM Software goes beyond conventional software models by developing ERP solutions that align with the unique practices, requirements, and dynamics of each industry.

With its team of experts in software, design, product development, and e-transformation, CPM Software adds value to companies' corporate development and digital transformation journeys.

Domestic Capital
A technology company founded entirely with domestic capital, with a strong belief in Türkiye's potential.

Expert Team
An experienced, solution-oriented team with expertise in software, design, and digital transformation.

Digitalization
Solutions that add value to businesses' corporate development and digital transformation journeys.

Industry Expertise
Custom project and integration experience across hundreds of businesses in diverse industries.

Corporate Approach

Business-Adaptive ERP Approach

Every business has its own unique dynamics and ways of working. Rather than relying on standard models, CPM ERP delivers tailored solutions through its flexible structure and expert approach.

Business Ethics & Quality
We prioritize business ethics and quality to ensure the highest levels of customer satisfaction.

Industry-Specific Solutions
We develop value-driven solutions by understanding the needs of diverse industries and their business processes.

Software, Design & Product Development Expertise
We support your business's future with a robust software infrastructure and continuous product development capabilities.

Multi-Company & Consolidated Management
Centrally manage multiple companies with consolidated reporting capabilities.

Digital Transformation-Driven Approach
We integrate technology into your business to boost efficiency and support your digital transformation journey.

We deliver flexible, powerful, and sustainable solutions to help your business achieve its goals.

"Solutions that adapt to your business, beyond conventional software models."

Platform

All Your Business Processes on One Platform

CPM ERP is an integrated ERP platform that enables businesses to manage their financial, operational, and administrative processes within a single unified system.

Advantages of a Single Platform

Unified Data Model
All departments work with the same data.

Centralized Management
Business processes are managed from single point.

Faster Decision Making
Make faster decisions with real-time information.
